

## SETTING UP AN ECO TEAM... PART ONE

### Where to start...

1. Ask your headteacher if you can establish an Eco Team or Eco Club within school
2. Find your best Eco Teacher and ask them to help run the Club
3. Decide a good time and day to meet- either a working lunch or an after-school club
4. Advertise for members of the Club- maybe you could make brilliant posters for around the school

### Why is setting up an Eco Team so important?

We all love our planet. If you are reading this newsletter, then you are already on the path to having a positive impact so well done!

By running an Eco Club at school, you can help to share brilliant ideas with your school mates to help them on their Green Journey too!

## ECO GARDEN

An Eco Garden doesn't have to be built in one day! Reach out to your headteacher and ask them if there is a small area of the school grounds that you can adopt.

The first thing you will need is to find the area and take some photographs of it as it is now.

Week by week, we will give you tips for how to establish an eco garden within your school.

Next week we will focus on levelling the ground ready for planning the first step of gardening.

## Recycling

Recycling is such an easy step towards being a greener school.

Easy wins- paper food waste plastics

Let's start with these and we can then help you to gradually grow your waste streams. You will simply need some containers such as old bins or cardboard boxes to collect the recycling in.

TOP TIP: Place a paper recycling bin next to the school's photocopier
